2019 PhD Candidate in
BiotechHealth PhD Program

Master thesis developed at the Institute for Research and Innovation in Health(i3S), focusing on the role of mitochondria and the non-targetted effect of ionizing radiation.

Research paper under revision

2015-2017 Master's Degree in Molecular
Medicine and Oncology at the
Faculdade de Medicina da
Universidade do Porto (FMUP)

Cell culture and cellular viability
assays

Since 2011 Radiotherapist at IPO-Porto

Flow cytometry for cellular viability
and ROS production
Immunofluorescence
Western Blot
PCR

2004-2009 Radiotherapy Degree by the
Escola Superior de Saúde do
Porto (ESS)

International English Level Testing
System (IELTS) Level 8

2019 Interrogations at the
Interface Advanced
Summer School
Do organoids fill the in
vivo / in vitro gap? at i3S

PC and Mac user.
Microsoft Office programs
ImageJ, GraphPad, SPSS

2019 European Master on
Radiobiology course at
Belgian Nuclear Center
(SCK-CEN)

Science outreach in radiobiology
RadBio (<http://radbio.home.blog>)
Organizer IPO-Porto's RTT Journal Club

2015 Molecular Pathology
Laboratory course

CONCERT-European Joint Programme
for the Integration of Radiation
Protection Research Travel Grant

Cinema and music. Embroidery.
Rudimentary guitar player and aspiring
drummer
